

More, more, more? Discovering what our students *really* want. The KU experience of UX.

Simon Collins, Information Specialist, Library & Learning Services
Robert Elves, Information Specialist, Library & Learning Services

Kingston University

- South West London
- 18,000 FTE students
- 4 campuses
- 5 faculties
 - Kingston School of Art
 - Arts and Social Sciences
 - Kingston Business School
 - Health, Social Care and Education
 - Science, Engineering and Computing

Kingston University Image Bank 2018

National Student Survey

Question 16: The library services were good enough for my needs

NSS Question 16 responses

Library & Learning Services User Survey

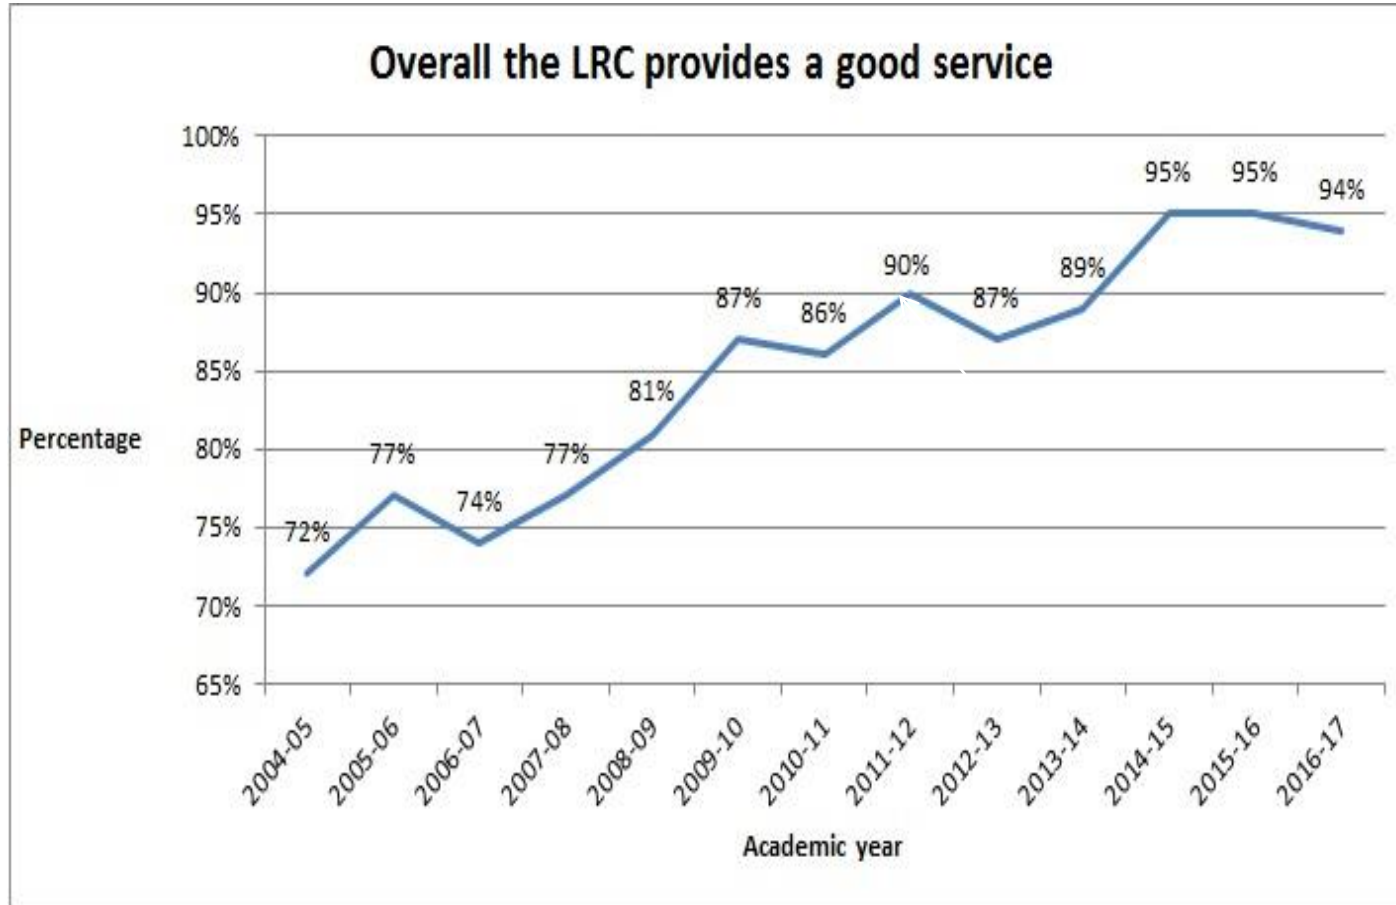

- ❑ Run for 13 years – that's a lot of data!
- ❑ Trends over time ...
 - Usage of print versus digital
 - Ownership of devices
 - Consistent use of space
- ❑ Positive changes – evidence to support ...
 - Improved learning environments
 - Longer opening hours
 - Better computer facilities eg. laptop loan
 - Enhanced materials budget

Kingston University Image Bank 2018

Challenges and limitations of the survey

- Original divergence between internal and external – not useful
- Consistency between LRC and NSS language
- Themed questions to dig deeper
- Student Voice action planning NOT just NSS!
- Continuous service improvement

The frustration of more!

- More books
- More space
- More PCs
- Longer opening hours
- Been there, done that ...
can't physically do any more!!

Collins 2017

Inspiration

UXLibs

=

Confidence

Barriers

- Institutional focus on metrics
- How to explain what UX is
- Time
- Money

Think outside the proverbial

- We got all staff involved
- Fed back
- All levels
- It is fun and different
- Capitalise on what is happening at your institutions

Collins 2018

Luck!

- SADRAS project
 - Time
 - Funding
 - Student input
 - Deadlines
 - Feedback

Student input

- They recruited
- student to student works well
- Good selling point

So what did we do

- Cognitive maps
- Observations- part way through
- Later on touchstone tours

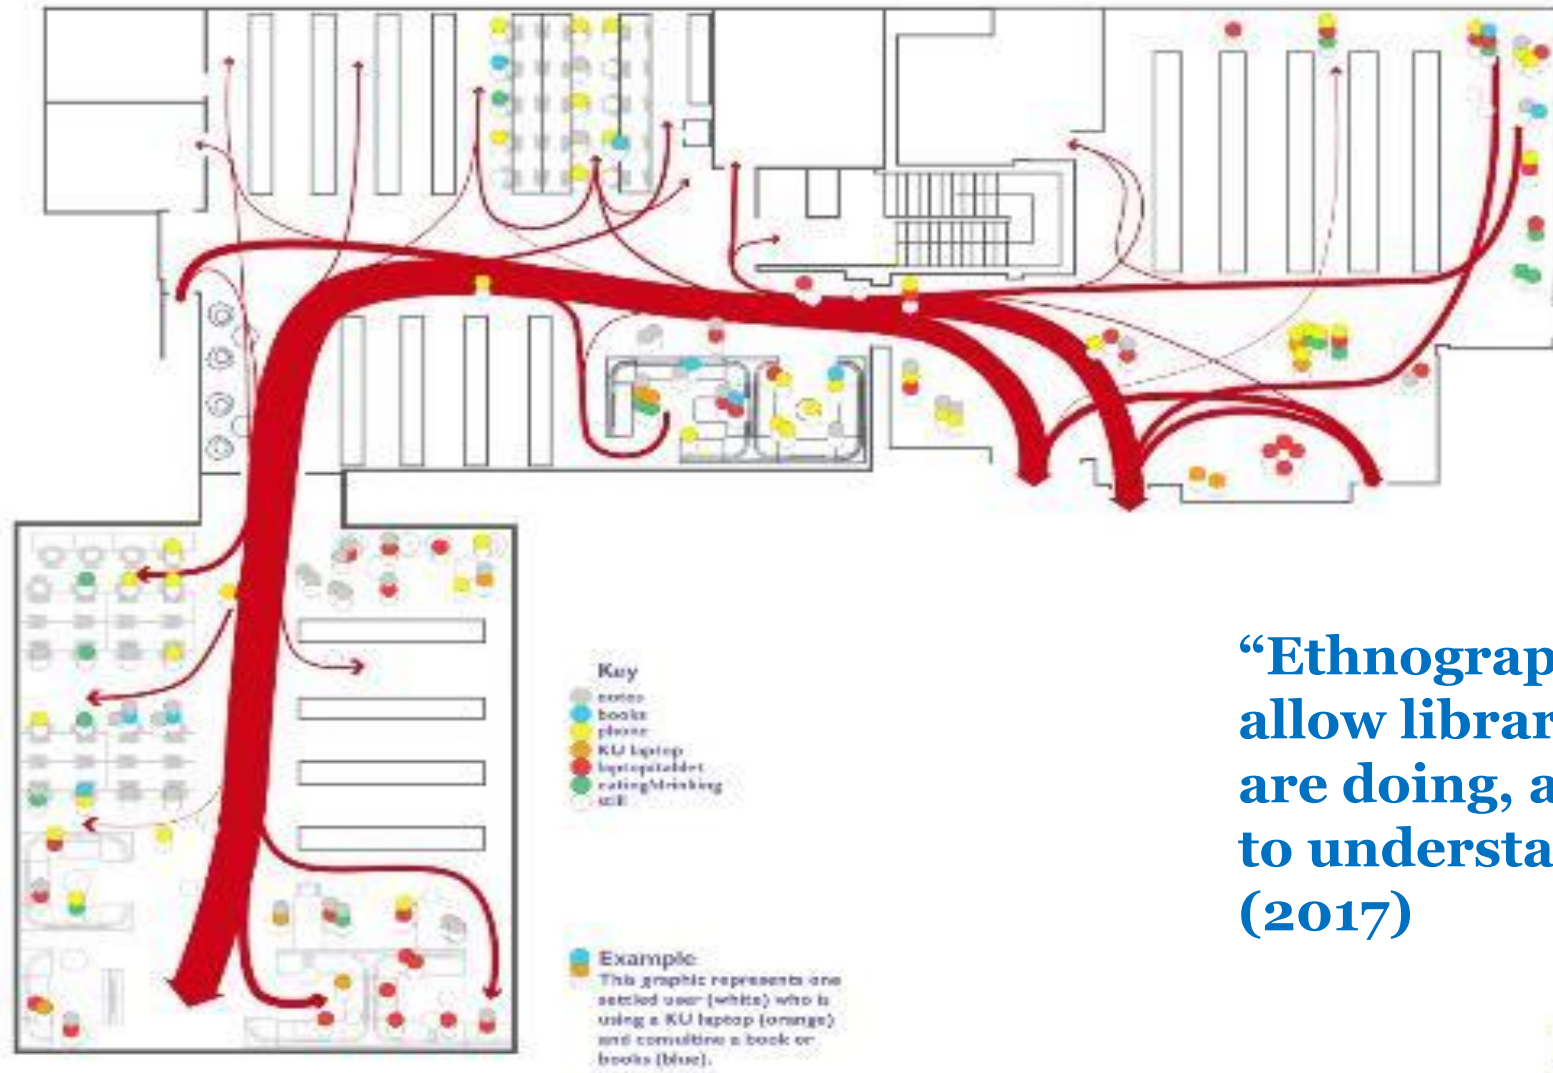

Elves 20165

Moving beyond 'more'

“Ethnography, a way of seeing, can allow libraries to witness what people are doing, and where, and then begin to understand why.” Lanclos, D. (2017)

08:00 09:00 10:30
morning

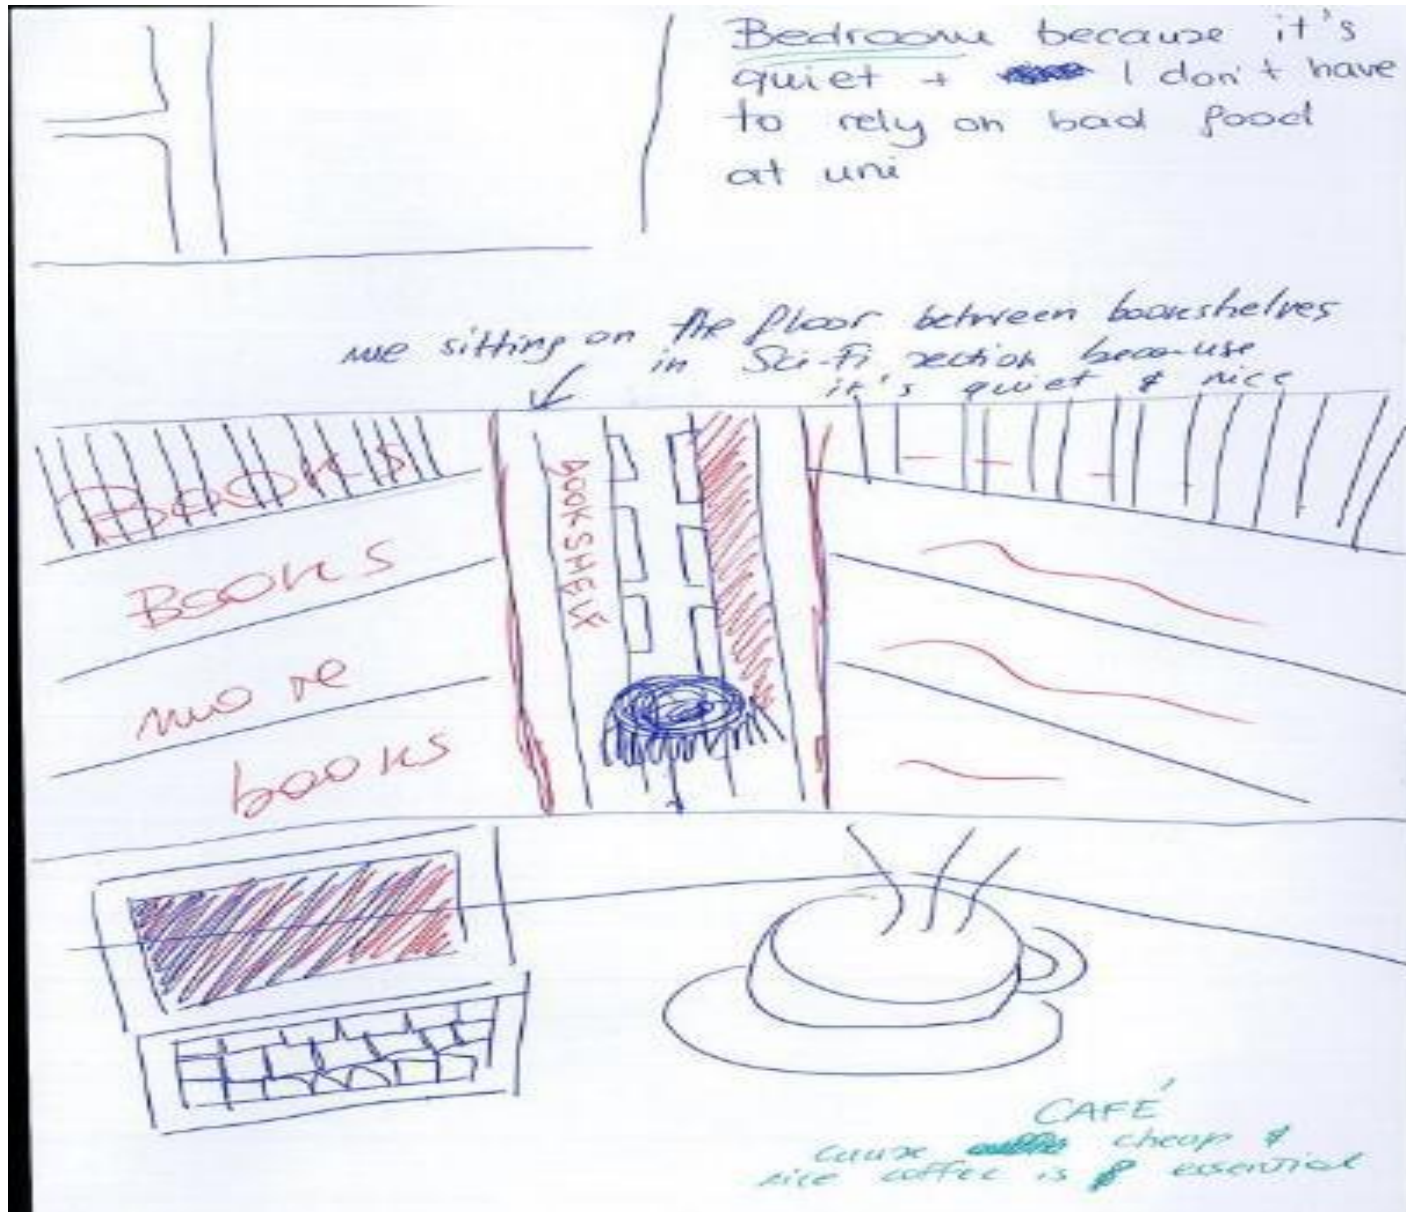

Moving beyond 'more'

night

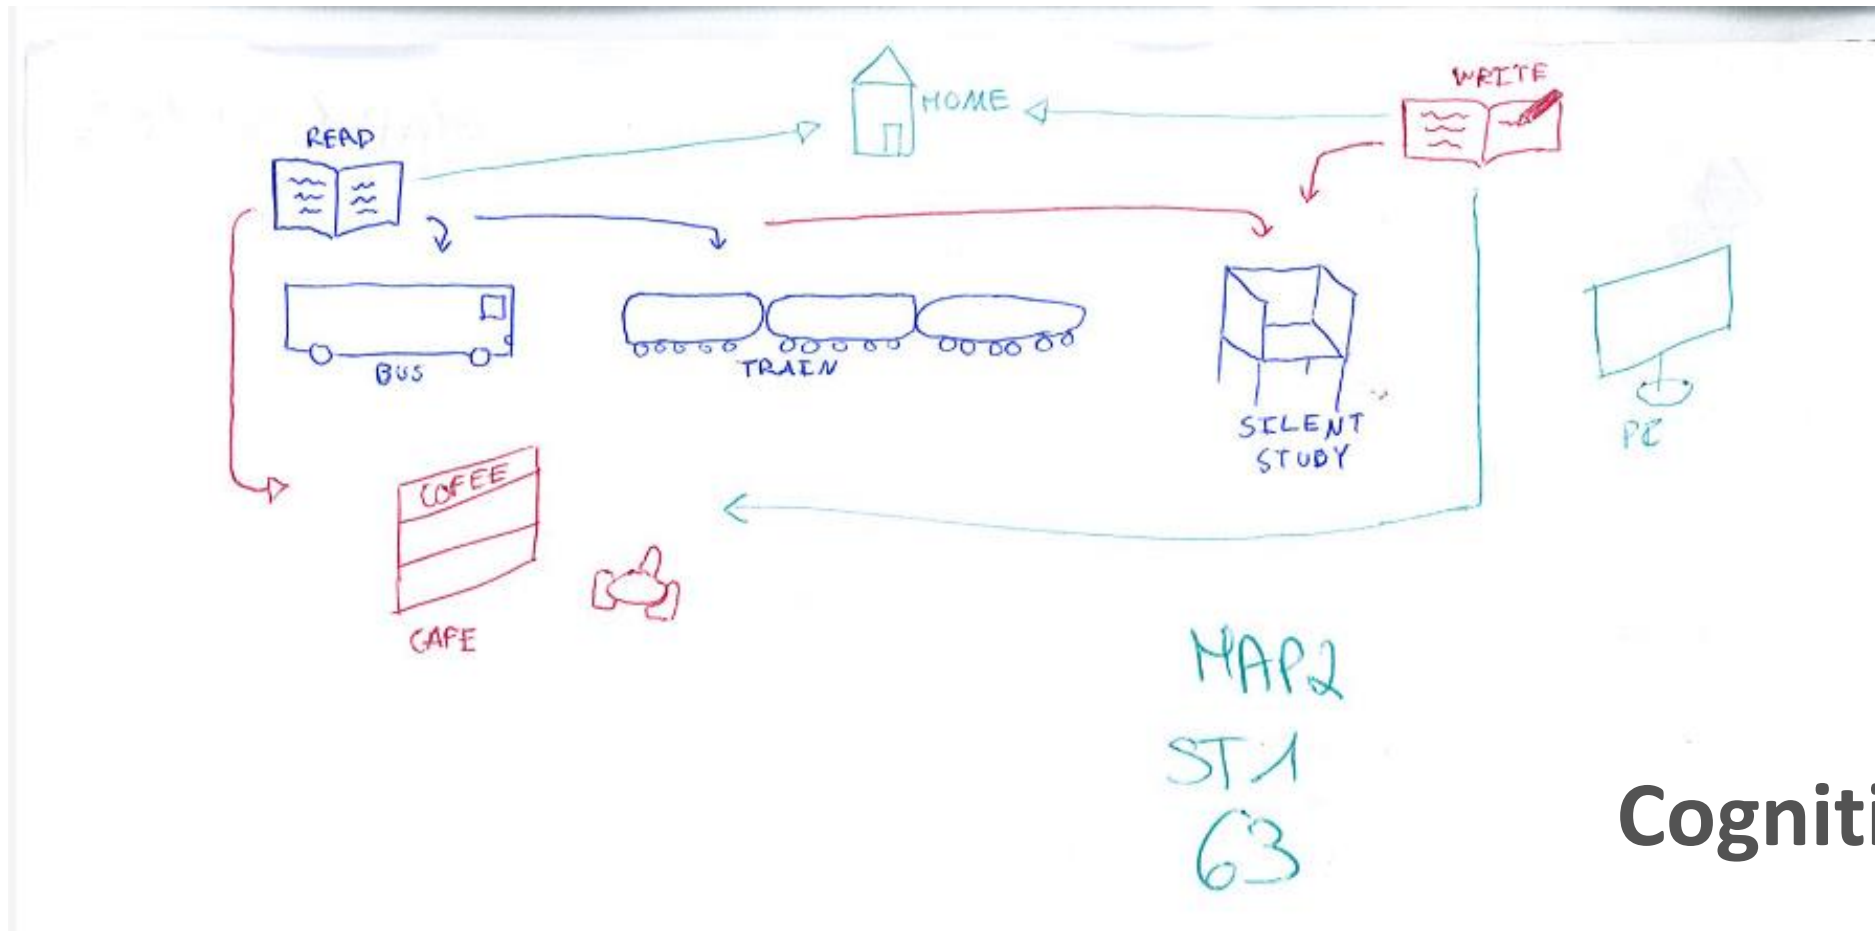

Maps of the LRC

Cognitive maps

Cognitive maps

Cognitive maps

Touchstone tours

- As already mentioned got staff to do them- example here
- Useful to capture feelings emotions
- See things with new eyes
- Small or large adjustments
- See what students see as important or NOT

The minutiae

Outcomes

- Repurposed an area
- It was evidenced by student comments
- We understand the space more
- “It bust myths”

New furniture

The blue chairs on the 1st floor are really comfortable.

New building

- £50 million
- Will contain a Library
- Landmark building for the University

Kingston University Image Bank 2018

-New building

Malone 2017

Collins 2018

And in conclusion ...

- ❑ Metrics and surveys have their place but, just occasionally, go wild and leave the questionnaire at home!
