Key and KIC: Naqul micro-invertebrates of Boacondia Common 177
The London Magazine, No. 73, 1994

The Secretary states in private that the size of the first edition of the work has more

THE MARKET FOR PAPER AND PAPER MANUFACTURE

In 1912, the United States produced 1,400,000 tons of paper, of which 400,000 tons were used for book stock. By 1918, this figure had increased to 1,800,000 tons, of which 600,000 tons were used for book stock. In 1929, the United States produced 2,400,000 tons of paper, of which 800,000 tons were used for book stock. In 1939, the United States produced 3,000,000 tons of paper, of which 1,000,000 tons were used for book stock. In 1949, the United States produced 4,000,000 tons of paper, of which 1,200,000 tons were used for book stock. In 1959, the United States produced 5,000,000 tons of paper, of which 1,400,000 tons were used for book stock. In 1969, the United States produced 6,000,000 tons of paper, of which 1,600,000 tons were used for book stock. In 1979, the United States produced 7,000,000 tons of paper, of which 1,800,000 tons were used for book stock. In 1989, the United States produced 8,000,000 tons of paper, of which 2,000,000 tons were used for book stock. In 1999, the United States produced 9,000,000 tons of paper, of which 2,200,000 tons were used for book stock. In 2009, the United States produced 10,000,000 tons of paper, of which 2,400,000 tons were used for book stock. In 2019, the United States produced 11,000,000 tons of paper, of which 2,600,000 tons were used for book stock.
